# 9

DISPLAYING VALID CODES

The CODES Menu

This option will allow you to view the valid codes for each field.

The lists that appear on the screen are the exact lists used by the program for validation. This way, there is no danger of discrepancy between the lists and what the program actually accepts as valid data.

The fish code list provides several search options so that you may use the program to find the codes you need to complete the form before you begin data entry.

```
Data Entry   Interview   Default   Codes   Batch   Reporting   Utilities   Exit
                            Aging Structure
                            Fish Codes
                            Fishery Type
                            Fishing Mode
                            Gear Type
                            Information Source

                    Display all fish codes
                    Search by COMMON Name
                    Search by SCIENTIFIC Name
                    Search by NODC Code
                    Search by NMFS Code
                    Search by LOCAL COMMON Name
                    Search by Erdman Code          n
                    Search by OECS Code
